Att Unit 2622
Atty Dkt 10002593-1

Amendments to the Claims

1. (currently amended) A device comprising:
a frame;
a lid movably attached to said frame, said lid being movable between a closed position and an open position;
a display mounted to said lid;
a photosensor array movably mounted within said frame; and
wherein said display is visible when said lid is in said closed position.
2. (previously presented) The device of claim 1 wherein said lid is hingedly attached to said frame.
3. (canceled)
4. (original) The device of claim 1 wherein said device is a digital picture frame device.
5. (original) The device of claim 1 wherein said photosensor array is a CIS photosensor array.
6. (original) The device of claim 1 wherein said photosensor array is a CCD photosensor array.

Claims 7-28 (canceled)

29. (currently amended) A system comprising:

Page 2 of 15

S/N 09/748,345
Art Unit 2622
Atty Dkt 10002593-1

a frame;
a lid movably attached to said frame, said lid being movable between a closed position and an open position;
a display mounted to said lid;
a photosensor array movably mounted within said frame; and
an object to be scanned by said photosensor array;
wherein at least a portion of said lid is directly adjacent at least a portion of said object when said lid is in said closed position.

30. (canceled)

31. (previously presented) The device of claim 29 wherein said photosensor array is a CIS photosensor array.

32. (previously presented) The device of claim 29 wherein said photosensor array is a CCD photosensor array.

33. (previously presented) The device of claim 29 wherein said photosensor array is a two-dimensional photosensor array

34. (currently amended) A method comprising:
providing a device comprising a frame, a photosensor array movably mounted within said frame, a lid movably attached to said frame and a display mounted to said lid, wherein said lid is movable between a closed position and an open position;

moving said lid to said closed position such that at least a portion of said lid is positioned directly adjacent at least a portion of an object; and
scanning said object with said photosensor array while said lid is in said closed position and said at least a portion of said lid is positioned directly adjacent said at least a portion of said object by moving said photosensor

array within said frame.

Claims 35-36 (canceled)

37. (previously presented) The method of claim 34 and further:
wherein said scanning causes an image of said object to be generated;
and
displaying at least a portion of said image of said object on said
display.

38. (previously presented) The method of claim 37 wherein said
displaying at least a portion of said image occurs when said scanning is
taking place.

39. (new) The device of claim 1 and further wherein:
an image is displayed on said display when said lid is in said closed
position.

40. (new) The device of claim 1 and further wherein:
a menu of options is displayed on said display.

41. (new) The device of claim 40 wherein one of said options is for
uploading an image to the internet.

42. (new) The device of claim 40 wherein one of said options is for
uploading or downloading an image via wireless communication.

43. (new) The device of claim 1 and further comprising:

S/N 09/748,345
Art Unit 2622
Atty Dkt 10002593-1

a removable memory card device.

44. (new) The system of claim 29 and further wherein:
an image is visibly displayed on said display when said lid is in said closed position.

45. (new) The system of claim 29 and further wherein:
a menu of options is displayed on said display.

46. (new) The system of claim 45 wherein one of said options is for uploading an image to the internet.

47. (new) The system of claim 45 wherein one of said options is for uploading or downloading an image via wireless communication.

48. (new) The system of claim 29 and further comprising:
a removable memory card device.

49. (new) The method of claim 37 and further wherein:
said image is visible when said is in said closed position.

50. (new) The method of claim 34 and further comprising:
displaying a menu of options on said display.

51. (new) The method of claim 37 and further comprising:
uploading said image to the internet.

52. (new) The method of claim 34 and further comprising:
uploading an image from said device or downloading an image to said device via wireless communication.

Art Unit 2622
Atty Dkt 10002593-1

53. (new) The method of claim 34 and further:
wherein said device further comprises a removable memory card
device;
wherein said scanning causes an image of said object to be generated;
and
using said removable memory card device to store said image on a
removable memory card.

54. (new) The method of claim 34 and further:
wherein said scanning causes an image of said object to be generated;
and
using said device to transmit said image to a remote location.

III. New Claims 39-54

New claims 39-54 are fully supported by the originally-filed application.

No new matter has been added.

New claim 39 recites the following:

39. (new) The device of claim 1 and further wherein:
an image is displayed on said display when said lid is in said
closed position.

This claim is fully supported with reference, for example, to applicant's
written specification at page 11, lines 23-35. New claims 44 and 49 are
similar to claim 39 and, thus, are also fully supported.

New claim 40 recites the following:

40. (new) The device of claim 1 and further wherein:
a menu of options is displayed on said display.

This claim is fully supported with reference, for example, to applicant's
written specification at page 11, lines 23-35. New claims 45 and 50 are
similar to claim 40 and, thus, are also fully supported.

New claim 41 recites the following:

41. (new) The device of claim 40 wherein one of said options is
for uploading an image to the internet.

This claim is fully supported with reference, for example, to applicant's

S/N 09/748,345
Art Unit 2822
Atty Dkt 10002593-1

written specification at page 12, lines 4-14. New claims 46 and 51 are similar to claim 41 and, thus, are also fully supported.

New claim 42 recites the following:

42. (new) The device of claim 40 wherein one of said options is for uploading or downloading an image via wireless communication.

This claim is fully supported with reference, for example, to applicant's written specification at page 12, line 15 - page 13, line 15. New claims 47 and 52 are similar to claim 42 and, thus, are also fully supported.

New claim 43 recites the following:

43. (new) The device of claim 1 and further comprising:
a removable memory card device.

This claim is fully supported with reference, for example, to applicant's written specification at page 13, lines 21-26. New claims 48 and 53 are similar to claim 43 and, thus, are also fully supported.

New claim 54 recites the following:

54. (new) The method of claim 34 and further:
wherein said scanning causes an image of said object to be generated; and
using said device to transmit said image to a remote location.
